Hadi Telecom have best solution in VoIP field with most technical professionals for best support, Leverage our network of value added resellers. Our channel comprises select organizations with the requisite expertise to help our customers successfully deploy FIT BOX solutions. FIT BOX is built on an IP based network. Every aspect of it is designed to enhance service, improve employeeand#39;s productively and control communication costs. It unites multiple locations of an organization and also promise cost saving by combing voice and data one single network that can be centrally mainstreamed. We have an Auto Dialing solution which can automate the False Billing Detection process. Auto Dialer will identify False Billing providing carriers and you can block those carriers from soft switch. Using FIT BOX you can stop unnecessary long calls in your office. If there is any longer call is placed in your office, you will have its detail in your Email.
