We are the sole distributers of Alubond USA Aluminium Composite panels in pakistan. Alubond U.S.A is the brand name for the new technology Aluminum Composite Building Panel from American Building Technologies, Illinois, U.S.A. The panel is a composite consisting of two layers of aluminum skin sandwiching a thermoplastic core in a continuous co-extrusion process. This new generation technology of mechanical and chemical bonding gives Alubond Panels an exceptional bond integrity. The outer aluminum skin for exterior grade Alubond U.S.A Panels is coated with PVDF Kynar 500 fluorocarbon coatings. The lower aluminum skin is chromate treated and polyester coated. The firerated aluminium composite panel is a new composite material skinned with coated aluminium alloy sheets and cored with non-combustible mineral. It has excellent fire resistance compared to normal aluminium compostie panel. It confirms to German standard DIN4102. Grade A-2.
