Syed Traders and companies (STC) was launched in Canada 5 years ago. In this time STC has branched off into many business sectors growing rapidly. They have since grown and have offices in Pakistan, Canada, Asia and Middle East By embracing the new green revolution, STC has been successful in funding and inventing eco-friendly products to save money and energy. Through extensive Research and Development in the last five years STC has been successful with solar and wind generated power, a filter system that cleans the water, energy efficient bulbs and much more. The partners of STC believe that the manufacturing, distribution, installation and sales and marketing of energy efficiency technologies is the way of the future. Providing customer solutions while saving money and protecting the environment is the future STC wants to provide for their clients. STC has invested in all of their own products therefore differentiating themselves from the competition.
