Eatz Food Products Let us introduce ourselves as the pioneers and the only manufacturers of genuine fruit leather in Pakistan. After due research and development we have perfected the recipe of dehydrated fruit leather. That is preserving the original taste, flavor and aroma of fruits is now available to the consumer all through the year. All flavors of fruit leather are also available. Fruit leather is produced by dehydrating fruit pulp to an extent that it attains a leathery texture. Fruit leather is a traditional Indian snack food that is also very popular in the Middle East and European countries. Our other products include: - Mangola (sweetened mango pulp in a stick like 5gm packing), that can be sipped out of the tube. - Chickee (peanuts mixed with corn syrup and sugar, moulded into a desired shape). - Cooking chocolate (high quality cooking chocolate moulded into 250 gm blocks) - Papadums (12 variety of crackers)
