Phone: 0213-5893018

It is now 20 years + when NATIONAL WATER ENGINEERING, a Private Limited company came into existence in 1987 as a joint venture with Mr. Gottfried Schmidth a Swedish process engineer to design, fabricate/ construct and install water and wastewater treatment plant, primarily to recycle sewage to develop greenery and to treat industrial effluent either for re-use or discharge in conformity to EPA requirement. Thus the objectives of the company, in brief, are:- 1.To survey water wastewater generation, both domestic and industrial being generated in Pakistan, specifically in the city. 2.To study their characteristic. 3.To find out the suitability of wastewater for the purpose of irrigation, development of greenery etc; and accordingly develop cost effective, environment friendly treatment system/ process. 4.To develop process regime keeping in view our conditions in Pakistan viz aviz operational difficulty, wastewater characteristic, operator lack of responsibility, minimum use of mechanic
