These professionals can handle any job the clients satisfactions LEARN MORE Rodent Control Adult House mice weigh from 1/2 to 1 ounce. They are generally grayish brown with a gray or off-white belly.

House mice live in and around homes, farms, commercial establishments, and in

open fields and agricultural lands. House mice will eat many types of food but prefer seeds and grain. Foods high in fat, protein, or sugar may be preferred even when grain and seed are present. Such items include bacon, chocolate candies, butter, and nutmeats. Unlike Norway and Roof rats, House mice can survive with little or no water, obtaining their water from moisture in the food they eat

Business Type: Service Provider
