Aqeel dental clinic was established in 1983 by Late Dr. Qazi Abdul Saleem and Mr. Qazi Muhammad Aqeel in Karachi. Dr. Qazi Abdul Saleem was a professional and certified dentist at the clinic, and Mr. Qazi Muhammad Aqeel was the dental lab technologist. This clinic was started on a tiny scale. Now, we have a vast team of dentist in Karachi who is ready to serve our people. From the start, we are providing two types of service. First, we provide Dental and Orthodontic Lab Services, in which we provide appliances to dentists like retainers, wires, artificial teeth, rubbers, positioners, spacers, headgear, etc. For this cause, our rates are very competitive with others because we use our appliances. And our second service is Dental treatments like braces/Invisalign, tooth implant, fillings, root canal, crown, extraction, scaling, teeth whitening, etc. We are providing high-standard treatment to our patients. Our mission is to make our patients satisfied with utmost care and affection. Patient satisfaction is the highest objective, and without compromising quality treatment, charges are kept at the most reasonable levels. You can count on our loving, friendly team to get to know you and identify your personal needs. We always take the time to attend and answer your questions. Whether you are visiting for a recurring cleaning or a primary surgical process, we ensure you receive easy care on your plan and your teeth.
