R.O. Tack Water Technology Â Water Treatment sector is undergoing a rapid change on account of the entry barrier in the global market. In competitive and quality environment, international level recognition has become need for every company for the longer-term growth. Every component of the quality system in the plant that meets the National and International standards has become necessity for today. Therefore, every step of the project delivery from conceptualization, detailed engineering to documentation have to be prepared to comply with the stringent regulatory requirements. Â The foundation stone of R.O. Teck Water Technology was laid in the year of 2009 in Karachi by a veteran Mr. Ayaz Attari and Mr. Azhar Frooqi is the main Director of the company who guided the company to touch the height of success. Due to the continuous efforts of the our directorÂ towards excellence, R.O.Teck Water Technology has become an unrivaled manufacturer & supplier of RO Water Sys
