PMW was setup in 1988 as Professional Manufacturer of Corrugated Board and Box Manufacturing Machines. Since its inception, PMW has always believed in the concept of continuous product development. And this concept has helped us manufacture and develop fully automatic range of machines like 5-Ply Corrugators, Flexo Folder Gluers, Flute Laminators along with other Semi-Automatic and manual machines. The company has also diversified its operations into Engineering and Consulting Services to the Paper Board Industry. The Scope of work in both areas stretches from establishing feasibility reports to the final commissioning of both Paper Board and Corrugated Box projects.
