COMPANY PROFILE Techno Source is an engineering concern serving industries since 1998, with its multi-field engineering solutions. The Techno Source team has endeavored to assist its clients with intricate requirements to improve operational efficiency and quality in both product and process. At Techno Source, we use a structured and practical approach towards designing, development and delivery of automation and information systems; ensuring a customer-supportable, long-term solution. In addition, we collaborate closely with our clients, to ensure that their teams operate independently with our on-site technical training and support services. **VISION** To emerge as a market leader and technical resource to our valued customers by providing quality services and maintaining a high level of professional and ethical standards and through optimum use of resources
