Our company deals in the field of monitoring and surveillance through IP cameras; head office is based in London (UK) for the last 4 years and is running its Lahore (PAK) office for the last 2 years. We are providing a highly innovative monitoring solution for the medium and large business sectors. Our research indicates that our technology is the first of its kind in Pakistan, which evidently offers significant advantage over all available similar and competing products/services. Our products can deliver the following customer benefits: Monitor home or business premises through live video on a mobile phone Record into remote locations so as to save the recording from fire and theft Monitor up to 500 cameras on a single computer screen anywhere, anytime Pass on management instructions through our audio video cameras Access recordings from anywhere, anytime
