Jamal Pipe Industries (Pvt.) Ltd., is one of the leading pipe manufacturing industry in Pakistan. M/s. JPI, is engaged in the manufacturing of M.S. and G.I. Steel Linepipes from diameters from 1/2' to 18' and thickness from 1.2mm to 10.0mm. The steel linepipes are duly manufactured from the requisite raw material (Hot Rolled Coils) on our largest Japanese High Frequency Welding Plant which is a new Development in the continuous welding technology. Our production is according to the recognized international standards such as API, BSS and ASTM. Our product of Steel Linepipes is being used in different projects of water, gas and petroleum etc., Our product is Steel Linepipes is as good as Seamless Pipes and thus being used in many projects where seamless pipes are required. We have different processes of coating, galvanizing, threading, testing and coupling in order to ensure the excellent performance, durability and dependability.
