Company Profile Brick Laboratories (Unani) was founded in 1978, by her founder Mr. Shuja Ullah, Who did his graduation in Pharmacy (B.Pharm.) in 1965 form one of the leading University of Pakistan. He worked for many reputable pharmaceutical companies in the department of marketing and sales as well as in production. He felt after a wide experience of pharmaceutical marketing the need of naturopathic (herbal) drugs for safe, effective treatment of the sick humanity. He started manufacturing drugs from documented, well researched and clinically trilled medicinal herbs, which were for the first time in Pakistan marketed strictly on ethical principal?s i.e. prescription sale only. It was a really difficult task to convince a qualified physician to prescribe a herbal drug but by the grace of Allah, all the technical material was presented in such a scientific Manner that a positive response was observed.
