Emerging Energy Systems (Pvt) Ltd is a leading solution provider in the alternate energy sector. Offering a wide range of products and services, EES currently has an established presence across the Middle East, south Asia and North America. As an organization that manufactures and supplied wind and solar powered machinery and equipment, EES aims to provide its clients solutions complete with consultancy, design, installation and support services. With an extensive range of in-house and outsourcing capabilities, we offer outstanding advantage and value for our clients. EES aims to counter the growing energy shortages, rising costs energy production, depletion of fuels and the extensive environmental damage that conventional energy production mechanisms are causing. Although the organization's primary focus is on spreading the use of wind and solar powered systems, EES also deals with technologies such as hydel, bio-fuels and hybrid systems that employ multiple technologies.
