HYDROLINK ENGINEERING and EQUIPMENT COMPANY previously known as Hydrolink Engineering Services, is a private limited company based at Taxila. Established in 2007, by a young team of professional engineers with great expertise in the development of Hydro Power in Pakistan, the previous manufacturers were not confident and have low technical assistance in the energy market, a team of young engineers entered in to the market with technical team to provide a complete solution for Mini, Micro and Small Hydro Power Projects. Our Capacity starts from Feasibility, Survey, Designing, Manufacturing, Installation, Transmission Line , testing and Commissioning of Hydro Power Projects ranges from 1KW to 1MW in Pakistan and Afghanistan. Our linkages are expanded in the international market, and have License from ENTEC Switzerland, a joint ventured agreement with Chinese Company for the implementation of projects beyond our capacity (beyond 1MW). Our team has designed, manufactured and installed
