From its inception in 1988, Abbas Steel Group has emerged as a prolific leader in the steel industry in South Asia. At present, the group consists of multiple manufacturing units, with a combined annual production capacity of approx. 200,000MT of steel. We have a combination of fully automated and manual re-rolling mills which allows us versatility in operations, increased production capacity, and product consistency; all paramount to the success in the steel industry. Abbas Steel Group is the largest provider of long steel products in the country. We take time to know our customers and how they do business. By getting to know our customers and markets and products, we are in a position to better serve their needs. Our extensive product range enables us to cater to different markets within the construction industry. - Wire Rod - Tor Bars - Deformed Bar - Bailing Hoops - Cold Drawn Wire - Shafts - Angles - Channels Part of our ethos at Abbas Steel is to be solid partners to our
