Sub: INTRODUCTION OF RELIANCE FIBRECRAFT Dear Sirs, We take liberty to introduce ourselves as manufacturer of Fibreglass Reinforced plastic (FRP) Products. FRP products are manufactured in our Factory under the supervision of a Technician who has vast experience in Fibreglass technology which he has obtained in his 40 years of association in this field both within the country and abroad. Fibreglass products are made available with a board range of Physical, Mechanical and Chemical properties, especially in the corrosion resistant applications, unlike conventional materials. Thus, it makes ideal for combating the corrosion problem that drains our National resources. Though FRP product cost a little more but if the following qualities are taken into consideration, you will find it more economical then any other products. 1. Light weight?thus assures maximum strength at minimum weight. 2. High Mechanical strength. 3. Good resistance to corrosion, Chemical, Weather and Heat. 4. Longer
