> Water is the world's most uncelebrated Miracle? As human population is growing exponentially, their demand for increased consumption of this natural resource is being put under strain. We look for most efficient technologies for the extraction, supply and distribution of water. Water is used for a variety of day to day needs for Agriculture, Irrigation, and Water Supply to remote Villages and to Urban Cities. Industry needs are met with this precious resource for its production and to improve the quality of its products. Waste water and Sewage water is to be safely treated and disposed without polluting rivers and seas. Water plays a vital role in the Development of Construction and Infrastructure requirements of any Nation and thus its overall economic growth. > Strategic Alliance With all of the above in mind and the fact that Pakistan is Agriculture based country, Group Chairman, Mr. Akram Sultan, decided to address these needs by forming an alliance based on Local Manufacturin
