Introduction to Connect Communications Connect is a team of hard workers and pushovers, who are determined to establish an elite network services spectrum on metropolitan level. Connect have a mission to build a stronghold for various network services on local link, such as super nodes, MSN and other utilities to provide maximum performance and high scalability to take full advantage of gigabit network. Connect is determined to provide state of the art broadband communication to each household on a very low cost. Connectand#39;s Backbone Project The Connectand#39;s Backbone Project is a mission to connect all cable networks spread in Karachi over a single optical fiber backbone connecting everyone across the city. This backbone have been formed in rings to provide redundant links to each node and a fully backed up internet bandwidth with state of the art management bundled with value added services. This backbone provides gigabit bandwidth support and an ideal metropolitan area netw
