construction Services: Tamimi Construction (SMC-PVT) Limited is based in Multan, providing Civil Works related products and services such as construction Services since 2021.

Recent pandemic has compelled a lot of businesses to think out of the box and modify their daily work routine to save cost which lead to a concept of remote work.

A lot of software houses almost went to 100% remote and after pandemic they decided to continue working remote to save their office expense.

But construction industry still has to tap this landmine which can save a lot of overheads for them.

That's where TCC comes in, we are Pakistan based legitimate construction company looking to outsource Pakistani AutoCAD designer/ drafter/civil engineers to international clients at a reasonable cost with no liabilities to the clients. They just need to pay an agreed lumpsum amount against an outsource individual. TCC will provide staff with office and desktop but licensed software shall be client responsibility.

Contact Person: Noor Ahmed Jamil
